

LEMNA INTERNATIONAL LAUNCHES LEMNA SOFTWARE DYNAMICS

Minneapolis, Minnesota, USA---Lemna International, Inc. announces the establishment of a new division *Lemna Software Dynamics*. The new division will complement Lemna's other activities in emerging economies around the world, all of them intended to assist these countries with faster economic development. *Lemna Software Dynamics* adds a high-tech component to Lemna's other divisions that provide a framework for progress through a variety of financing and infrastructure services.

Freescale, one of the US semi-conductor companies, has awarded a contract to *Lemna Software Dynamics* to provide quality assurance services for the Code Warrior (CW) compiler products. In announcing the contract, Poldi Gerard, Vice-President of Marketing said, "The establishment of *Lemna Software Dynamics* is a step forward in implementing Lemna's philosophy of bridging and integrating key services. We are very pleased that a prestigious company such as Freescale is giving us the opportunity to demonstrate our commitment to quality and creativity in this competitive field." The contract from Freescale is the first phase of a two-phase program.

Lemna Software Dynamics has its main operations at Lemna's corporate headquarters in Minneapolis, Minnesota, USA. Its first branch office is located in Ho Chi Minh City, Viet Nam.

Lemna International is a world leader in designing, financing, and implementing infrastructure projects that assist emerging countries in their growth and development. It specializes in the environmental, energy, and transit sectors and has a number of proprietary technologies. Based in the American state of Minnesota, the company has designed and built over 300 infrastructure projects in 18 countries. Its website is www.lemna.com.
