

LemTec™ Covers

LEMNA
TECHNOLOGIES, INC.

Innovative Cover Solutions

AMERICA'S #1 WASTEWATER COVER

BEST SELLING COVERS IN THE INDUSTRY

Let Lemna improve the performance of your existing wastewater treatment facility. We solve problems of odor, algae and heat loss in any tank or lagoon. Our covers are simple and virtually maintenance-free. We can provide a custom design, based on your needs, in your time frame. We have hundreds of wastewater treatment facilities to our credit . . . *Let us work for you.*

LemTec™ Modular Insulated Covers are the premier floating modular covers in the market offering solutions for odor containment, heat retention, algae control, bird/animal mitigation and improvement of effluent quality in tanks and ponds.

MUNICIPAL AND INDUSTRIAL

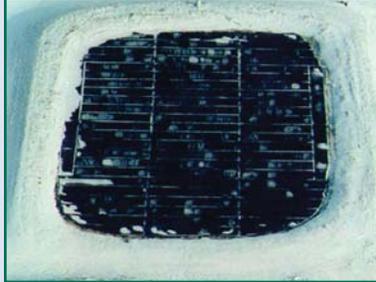

LemTec™ Gas Collection Covers are less expensive than traditional technologies while also providing additional benefits such as heat retention, serviceability and easy equipment access. Our covers are maintained under a negative pressure, therefore eliminating huge ballooning and water entrapment that are common with other cover manufacturers covers.

INSULATED MODULAR COVER

FIRST AND STILL THE BEST . . .

Lemna Technologies was the **1st** company to introduce a floating modular cover system in the wastewater industry. This innovative patented cover solution consists of individual casings that are fastened together to form a complete cover over the water surface. Each individual casing consists of closed cell insulation sealed between two sheets of durable geomembrane. The result is a cost-effective, easy to install, maintenance-free solution.

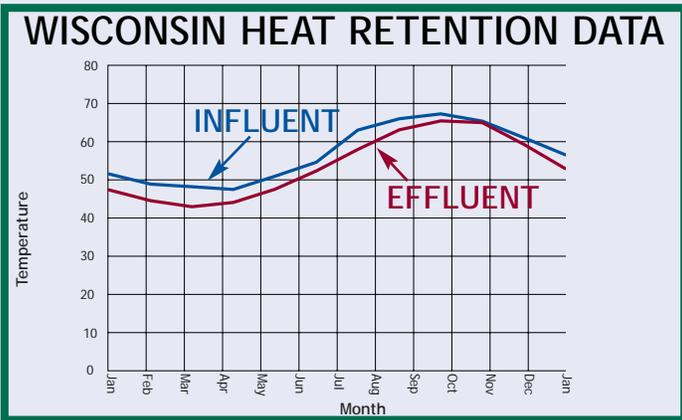

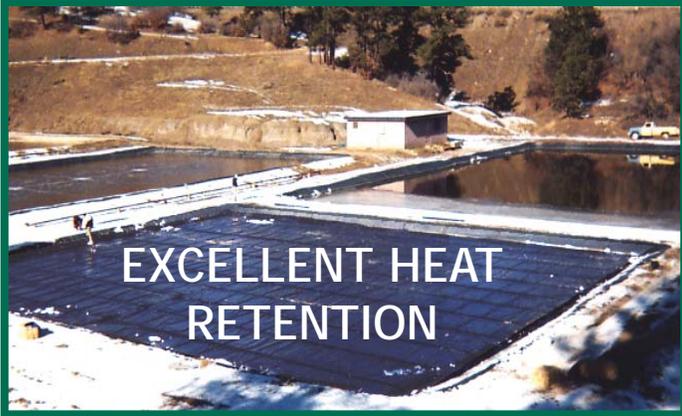

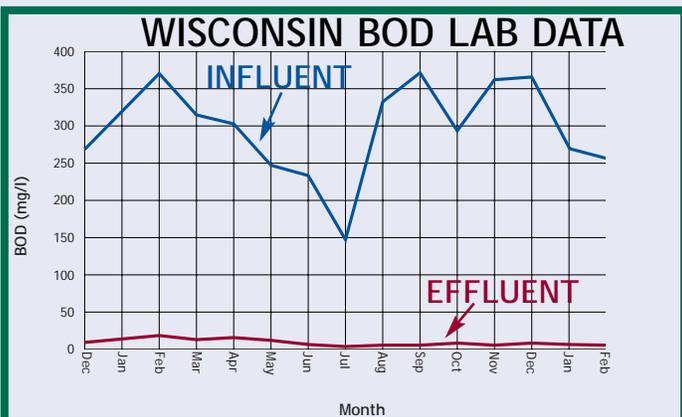

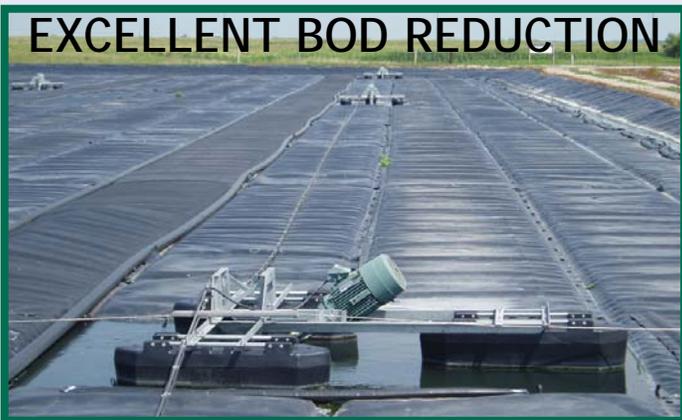

SIMPLY THE BEST

BEFORE	OTHER COVER SUPPLIERS TYPICAL PROBLEMS	AFTER	LEMNA'S COVER SOLUTIONS
			
Rainwater Ponding			
Problem	Eliminated		
Ballooning			
Gas trapped causes ballooning	Gases escape between casings		
Heat Loss			
Uninsulated-heat escapes	Insulation provides heat retention		
Varying Water Levels			
Water level limitations	Adapts to any variation in water level		
Custom Hatches			
Not available or cumbersome	Access to submerged or floating equipment, or for sampling		
Rainwater Collection Pumps			
Required	Rainwater passes between casings		
Field Welding at Installation			
Required	Not Required		
Maintenance and Repair			
Entire cover needs to be removed	Only individual casings need to be removed		
Installation			
<ul style="list-style-type: none"> • Large crew • Heavy mechanical equipment • Basin usually needs to be empty 	<ul style="list-style-type: none"> • Small crew • No heavy equipment • Basin can be full or empty

GAS COLLECTION COVER

WE TAKE NO SHORT-CUTS IN QUALITY, OUR GAS COLLECTION COVERS ARE BUILT WITH 100% VIRGIN PLASTIC, 100% OF THE TIME

- Wide selection of design options available to meet a variety of budgets.
- Easily adaptable to accommodate a wide range of “R” Values.
- Air-tight cover traps and efficiently channels gas to perimeter for draw-off.
- Rainwater quickly and easily removed via low horsepower surface pumps.
- Years of trouble free service.

LEMTEC™ GAS COLLECTION COVER

THE LEMTEC™ GAS COLLECTION COVER PROVIDES AN IDEAL SOLUTION FOR ODOR CONTROL AND HEAT RETENTION IN INDUSTRIAL APPLICATIONS

LEMNA ADVANTAGES

FULL ENGINEERING SERVICES PROVIDED

- Project Plans and Specifications at NO COST
- Detailed drawings and budgets
- Complete proposals with design and pricing
- Installation estimates and requirements
- Guaranteed results
- Full Warranty

YEARS OF *NO MAINTENANCE* AFTER INSTALLATION

- Rain and snow melt drain off cover . . . *guaranteed*
- Cover is easily removable
- Easy access to aeration and mixing equipment
- UV resistant
- HDPE provides years of maintenance-free operation
- Snow, rain or gas-no problem

FAST INSTALLATION

- Most covers are installed in less than a week
- Installed when basin is either empty or full
- Installed when process is online
- Installed with little to no field welding
- Installed with a *small* crew
- Installed with little or no heavy equipment
- Installation supervision by our site superintendents with *millions of installed square feet of geomembrane experience*

IDEAL FOR INDUSTRIAL PROCESSES

- Food processing plants
- Pulp and paper plants
- Chemical plants
- Heavy and light manufacturing
- Mining
- Dairies
- Feedlots
- Pharmaceutical

LEMNA ADVANTAGES

CUSTOM DESIGN

- Designed to accommodate any type of cutout, contour or equipment penetration
- Meets snow load requirements
- Meets high wind requirements
- Meets heat-loss requirements
- Meets access hatch and walkway panel requirements
- Meets any basin configuration requirements

YEARS OF PROVEN RESULTS

- No odor
- No ponding
- No ballooning
- No leaks
- No problem

WE OFFER THE *MOST* OPTIONS IN THE INDUSTRY

- Individual removable panels
- Walkways
- Access hatches
- Sampling ports
- Metal tanks
- Concrete tanks
- Earthen basins
- Heat retention
- Effective rainwater removal
- U.V. resistant components
- Stainless steel components

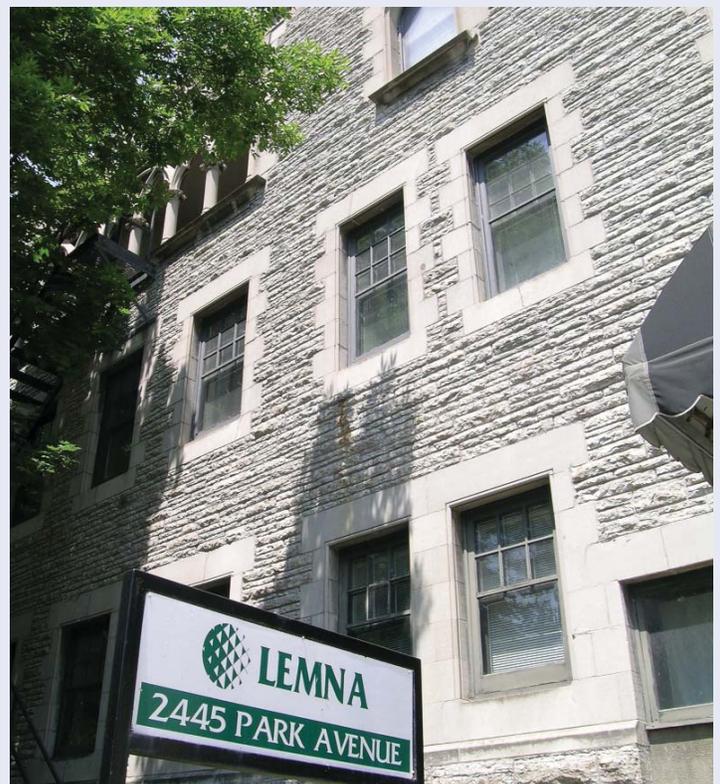

**LEMNA IS THE LEADER IN MAINTENANCE-FREE
MODULAR COVER DESIGN, SUPPLY AND INSTALLATION**

AMERICA'S WASTEWATER COVER

Lemna has been the world leader for more than 25 years in high-performance lagoon-based wastewater treatment technologies. We have 100's of treatment facilities with installations on four continents.

Headquartered in Minneapolis, Minnesota, Lemna designs and installs systems for all municipal and industrial applications. Whether supplying a floating cover to control odor or algae, or providing a turn-key wastewater treatment system to meet strict limits, "Lemna always has the solution to meet our customer's needs."
